Worcester Youth & Family Counseling Selects ClinicTracker by JAG Products, LLC

Worcester will implement BillingTracker System in first phase

Dewitt, NY July, 2009 — JAG Products, LLC, provider of EMR and Clinic Management solutions, announced today that Worcester Youth & Family Counseling Services of Berlin, MD has selected the ClinicTracker suite of products to manage their Family Services agency. Worcester is implementing the BillingTracker module to handle their insurance claims, billing forms, and receivables.

"We wanted a solution that would integrate with our MIP Fund Accounting software. The BillingTracker module helps us achieve that goal with ease. We also liked the potential to expand to the ClinicTracker EMR system for progress notes, treatment plans, and compliance tracking. It was ClinicTracker's flexibility that really sold us. We loved that it could solve our billing needs today and expand to meet our clinic management needs down the road," said Teresa Fields, Executive Director of Worcester Youth & Family Counseling Services.

Worcester will implement the following solutions from JAG Products, LLC:

BillingTracker is a complete claims and billing solution for any Mental Health, Chemical Dependence, Family Service, or Home Care agency. Designed to work as a stand-alone or fully integrated offering, BillingTracker manages an agency's entire financial operation. It supports sophisticated fee schedules and easily handles recording of patient/insurer payments, adjustments, and write-offs. BillingTracker supports ANSI 837 electronic claims, Medicare and Medicaid claims, and HIPAA compliant CMS1500 paper claims. BillingTracker's built-in automation makes the billing operation more efficient and improves cash flow to the agency.

ClinicTracker was designed by behavioral health professionals to solve the daily challenges involved in managing a Mental Health, Chemical Dependence, Family Service, and Home Care agency. Powerful on-line reporting delivers instant analysis of key clinic functions. ClinicTracker advantages include compliance tracking, internal messaging system with alerts, patient and staff scheduling, eForms with signature capture, and document management for a completely paperless EMR.

"Because many agencies are under financial pressures, they need to automate their operations and increase efficiencies. ClinicTracker is a solution that informs everyone from clinicians to administrators to the executive committee," said Joshua Gordon, President of JAG Products. "You can't manage an operation if you don't really know what's happening day to day. ClinicTracker offers a real-time dashboard into the entire operation."

Worcester consulted Applied Business Services, Inc. in 2005 for a complete accounting and fundraising software solution. ABS evaluated Worcester's specific needs and successfully implemented the SAGE MIP Fund accounting software to provide a fully-integrated system for their agency. Worcester contacted ABS to locate a third-party clinic management program that would work with the MIP software. ABS reviewed the flexible features available in ClinicTracker and BillingTracker that will offer a complete and integrated system.

Worcester Youth and Family Counseling, established in 1975, is located in Worcester County, Maryland. They provide comprehensive counseling, victim assistance services, and psycho-education around child abuse and neglect. Currently, they operate two locations in Berlin and Pocomoke City, Maryland.

About JAG Products, LLC

JAG Products, developer of ClinicTracker, BillingTracker, AlertTracker, ReviewTracker, and more, has been meeting the needs of mental health clinics since 1998. Its flagship product, ClinicTracker, is an agency-wide solution that has won high praise for its intuitive interface, time-saving array of functions, and responsive support. All of JAG's solutions promote accountability, efficiency, and improved patient care. Learn more at www.JAGProducts.com.
